INTERNSHIP

MERN Stack Intern — [Sri Eshwar College of Engineering] 2025

Worked on full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Built responsive web applications, developed REST APIs, managed database operations, and integrated frontend with backend services to deliver scalable end-to-end solutions.

DevOps and SRE Intern — [Sri Eshwar College of Engineering] 2026

Assisted in deploying and managing applications using Docker, Kubernetes, and Linux while monitoring system performance and reliability. Gained hands-on experience in CI/CD pipelines, cloud infrastructure, automation, and troubleshooting production environments.

PROJECTS

AI Cloud Resource Optimization for VMs and Containers

An AI-driven hybrid cloud platform that optimizes resource utilization, enables intelligent workload management, and reduces operational costs through efficient resource federation and automation.

Food Ordering System – MERN Stack Project

Developed a Food Ordering System using the MERN stack (MongoDB, Express.js, React.js, Node.js). Implemented features like user authentication, menu display, cart management, and order processing. Integrated REST APIs with a responsive React interface for smooth frontend-backend communication.
